POOL FENCES

INSTALLATION STYLES

SPIGOTS

The spigot is our most popular method for frameless pool fencing because it is versatile and can be applied to so many different surfaces, while providing a minimalistic design. Spigots are both durable and desirable with 2 spigots per panel.

STANDOFF ANCHORS

The standoff anchor can be used without compromising the overall aesthetics by maximizing the space, by using every inch of your floor space. This provides you with an array of design opportunities, offering a unique and effective approach by using one panel with 4 or 6 pins.

CONCRETE CHANNEL

Concrete channel is the ultimate option to enhance beautiful surrounds. Recommended with concrete footings for the most support. You can't beat the sleek design that a channel can provide to your outdoor area, creating an ultra-modern feel to your pool.

SMART SPIGOTS

Similar to standoff anchors in functionality, with a slightly different design. The smart spigot is a popular choice to create a crisp design element, allowing you to maximise every space available.

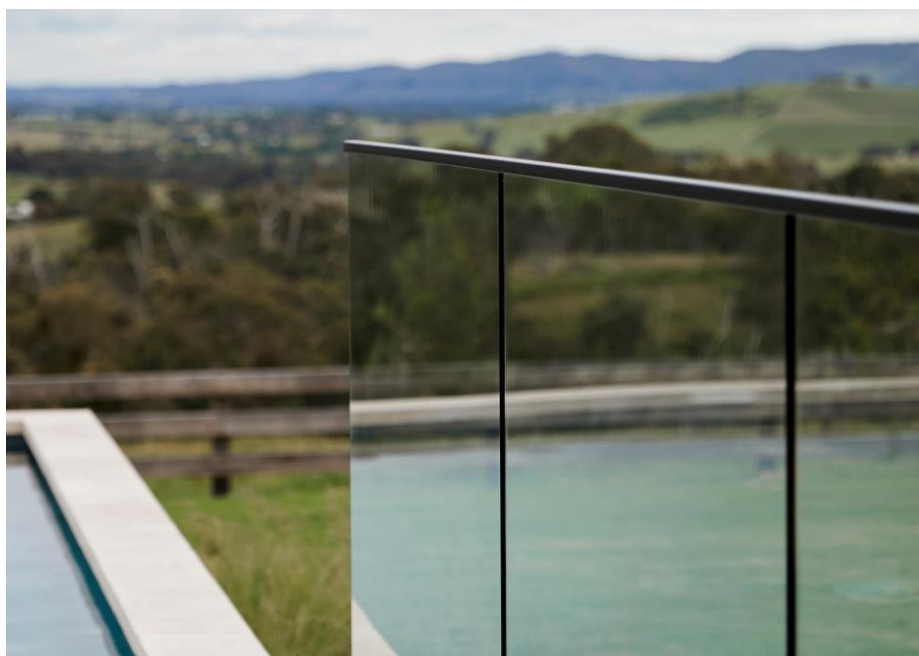

HANDRAIL

If choosing a hand rail for safety, practicality or purely for design, all of our hand rails are custom welded by our team to perfectly fit your new glass panels.

TOP RAIL

A handrail is a great way to add an extra design element. Custom welded by our team to perfectly fit your new panels. To meet Aus regulations, a top rail is also required if you have a fall of 1m or greater. If a hand rail doesn't suit your design, we can opt for engineered glass as this is stronger and can eliminate the need for a rail.

A modern outdoor pool area featuring a wooden slat fence, a glass pool fence, a concrete bench, and a fire pit. The scene is set in a lush, green environment with trees and plants. The pool is visible through the glass fence, and the concrete bench is positioned along the pool's edge. A fire pit with a fire is in the foreground, and a bottle of wine and glasses are on the bench. The overall aesthetic is clean and contemporary.

A modern staircase with wooden treads and a glass balustrade, viewed from below. The staircase is set against a large glass wall that reflects the interior and exterior. The text "INTERNAL AND EXTERNAL BALUSTRADES" is overlaid in white, bold, sans-serif font. Below it, "INSTALLATION STYLES" is written in a smaller, white, sans-serif font. The background shows a concrete floor, a ceiling with a light fixture, and lush green plants outside.

INTERNAL AND EXTERNAL BALUSTRADES

INSTALLATION STYLES

We offer two style design options for your internal and external balustrades.

FRAMELESS

Frameless balustrades are our most popular choice and you can see why! You simply can't beat how sleek and endlessly customisable a frameless glass balustrade can be.

Over the next two pages, you'll find everything you need to know about our frameless glass balustrades.

SEMI FRAMELESS

Semi frameless glass balustrades are a fantastic way to create a luxurious feel with clean lines and a contemporary look, without inhibiting the view or the sense of space. The good news, semi frameless balustrades are the most cost-effective glass option you will find, and they look great too!

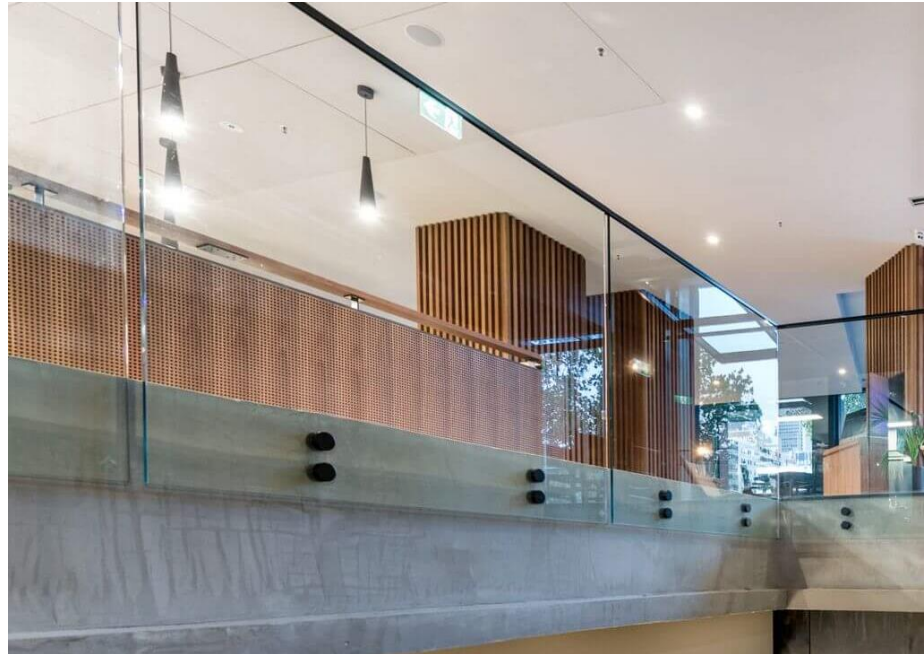

SPIGOTS

The spigot is our most popular method for frameless balustrades because it is versatile and can be applied to so many different surfaces, whilst providing a minimalistic design. Both durable and desirable with 2 spigots per panel. Commonly finished with a top rail or handrail (or both if required).

STANDOFF ANCHORS

The standoff anchor can be used on balconies, decks, lofts or on rooftops without compromising the overall aesthetics by utilising every inch of floor space. This provides you with an array of design opportunities. Standoff anchors offer a unique and effective approach of one panel with 4 or 6 pins.

GLAZING CHANNEL

For a truly awe inspiring design, we offer a glazing channel. With the option for embedded so it is hidden under the surface or viewed above the surface (left), depending on your preferred design style. This is the ultimate option to enhance beautiful surrounds, creating an ultra-modern feel to your indoor or outdoor space.

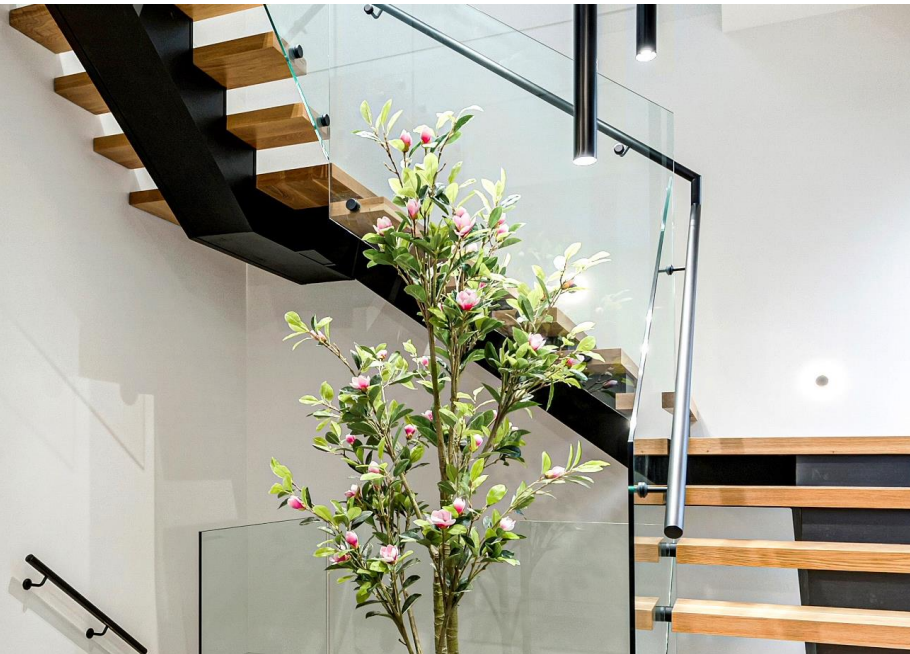

SMART SPIGOTS

Similar to standoff anchors in functionality, with a slightly different design, the smart spigot is a popular choice to create a crisp design element, allowing you to maximise the space by utilizing every inch of floor space available.

HANDRAIL

If choosing a hand rail for safety, practicality or purely for design, all of our hand rails are custom welded by our team to perfectly fit your new glass balustrade.

TOP RAIL

A handrail is a great way to add an extra design element. Custom welded by our team to perfectly fit your new panels. To meet Aus regulations, a top rail is also required if you have a fall of 1m or greater. If a hand rail doesn't suit your design, we can opt for engineered glass as this is stronger and can eliminate the need for a rail.

A modern interior staircase with wooden treads and black metal stringers. A glass balustrade with black metal handrails is installed. In the center, a potted plant with green leaves and pink flowers sits on a wooden platform with grey pebbles. The floor is covered in a grey speckled carpet.

INTERNAL AND EXTERNAL BALUSTRADES

GLASS COLOURS

CLEAR GLASS

You can't beat the crisp appeal that clear glass offers to your indoor or outdoor space. Clear glass is a great way to allow other elements in the space to be seen and it will make the space appear lighter and airier.

For an ultra clear option, we suggest opting for low iron glass.

FROSTED GLASS

Frosted glass is a fantastic way to offer privacy if required or can also be used as a design statement within your space.

Frosted glass balustrades are very functional and can be easier to maintain than clear glass.

CUSTOM GLASS

Wanting that extra special design element to your space? We can supply narrow reeded, grey tint or a graphic film onto your glass balustrade to add that eye catching element.

SHOWER SCREENS

INSTALLATION STYLES

BRACKETS

Brackets are our most popular method for shower screens as it is versatile, whilst providing a minimalistic design. Being a classic solution for small and large bathroom interiors.

GLAZING CHANNEL

After a sleek and elegant design? You can't look past this the glazing channel. With no hardware visible, it offers a truly impressive and modern feel to your bathroom. Allowing the eye to effortlessly travel through your space, with no hardware to obscure your view.

FRAMED CHANNEL

When hardware is the main design element in your bathroom, we recommend opting for a framed channel. This can perfectly match with your hardware and bring the whole space together. Adding a contemporary and stylish finish to your space.

HARDWARE COLOURS

We can also offer a variety of additional hardware colours and finishes to complete your bathroom and add that extra touch of design to the space. Get in touch to know more.

A modern bathroom interior featuring a large glass shower screen, a wooden vanity with a white countertop and sink, and a white freestanding bathtub. The walls are covered in light-colored rectangular tiles, and the floor is made of dark grey tiles. A black shower fixture with a large rain showerhead and a handheld showerhead is visible. A mirror is mounted on the wall above the vanity, reflecting part of the room. The lighting is soft and even.

SHOWER SCREENS

GLASS COLOURS

CLEAR GLASS

You can't beat the crisp appeal that clear glass offers to your bathroom or ensuite. Whichever tiles you choose for your bathroom, clear glass will allow these to be seen and it will make the space appear lighter and airier.

For an ultra clear option, we suggest opting for low iron glass.

FROSTED GLASS

Frosted glass is a fantastic way to offer privacy if required or can also be used as a design statement within your space.

Frosted glass shower panels are very functional and can be easier to maintain than clear glass.

CUSTOM GLASS

Wanting that extra special design element to your bathroom? We can supply narrow reeded, grey tint or a graphic film onto your shower screen to add that eye catching element.

A photograph of a modern swimming pool with a glass safety fence. The pool is filled with clear blue water and is surrounded by a light-colored concrete deck. In the background, there is a brick house with a blue roof and a wooden fence. The pool is bordered by a glass fence, and there are green bushes and plants around the pool area.

ENDUROSHIELD

GLASS COATING

THE WORLD'S LEADING GLASS TREATMENT

A permanent* coating that is
both water and oil repellent

REPELS WATER

Ultimate protection

Optically clear, UV stable, chemical resistant, water and oil repellent

Reduces maintenance costs

EnduroShield keeps glass visibly cleaner for longer and reduces the frequency between cleans

Highly durable

Permanently bonds to the glass and comes with a true 10 year warranty for new glass and a 5 year warranty for existing glass.

Suits all glass ranges

From balustrading to pool fencing and shower screens, EnduroShield is the smart choice for glass
