ENDUROSIELD

Glass coating.....24

An aerial view of a modern backyard pool. The pool is rectangular with a curved end and is surrounded by a light-colored concrete deck. A glass fence with black metal posts and rails runs along the edge of the deck. The pool is bordered by a brick wall on one side, which is covered in climbing plants. There are two beanbag chairs on a concrete pad at the top of the pool. The surrounding area is lush with greenery, including ferns and various shrubs. The overall aesthetic is clean and contemporary.

POOL FENCES

INSTALLATION STYLES

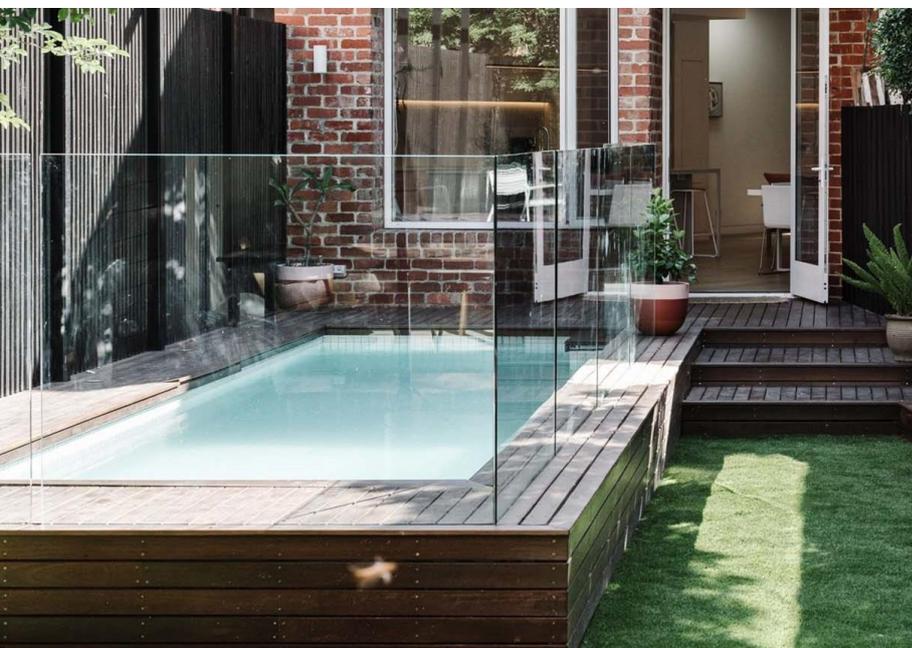

SPIGOTS

Spigots are our most popular style for frameless glass pool fencing because it is versatile and can be applied to so many different surfaces, while providing a minimalistic design. Spigots are both durable and desirable with two spigots per panel.

STANDOFF ANCHORS

The standoff anchor can be used without compromising on your overall design aesthetic by maximizing your floor space. This provides you with an array of design opportunities, offering a unique and effective approach by using four or six anchors per pane of glass.

GLAZING CHANNEL

The glazing channel is the ultimate option to enhance beautiful surrounds. Recommended with concrete footings for the most support. You can't beat the sleek design that a channel can provide to your outdoor area, creating an ultra-modern feel to your pool.

SMART SPIGOTS

Similar to standoff anchors in functionality, with a slightly different design. The smart spigot is a popular choice to create a crisp design element, allowing you to maximise your floor space, perfectly suited for a compact area.

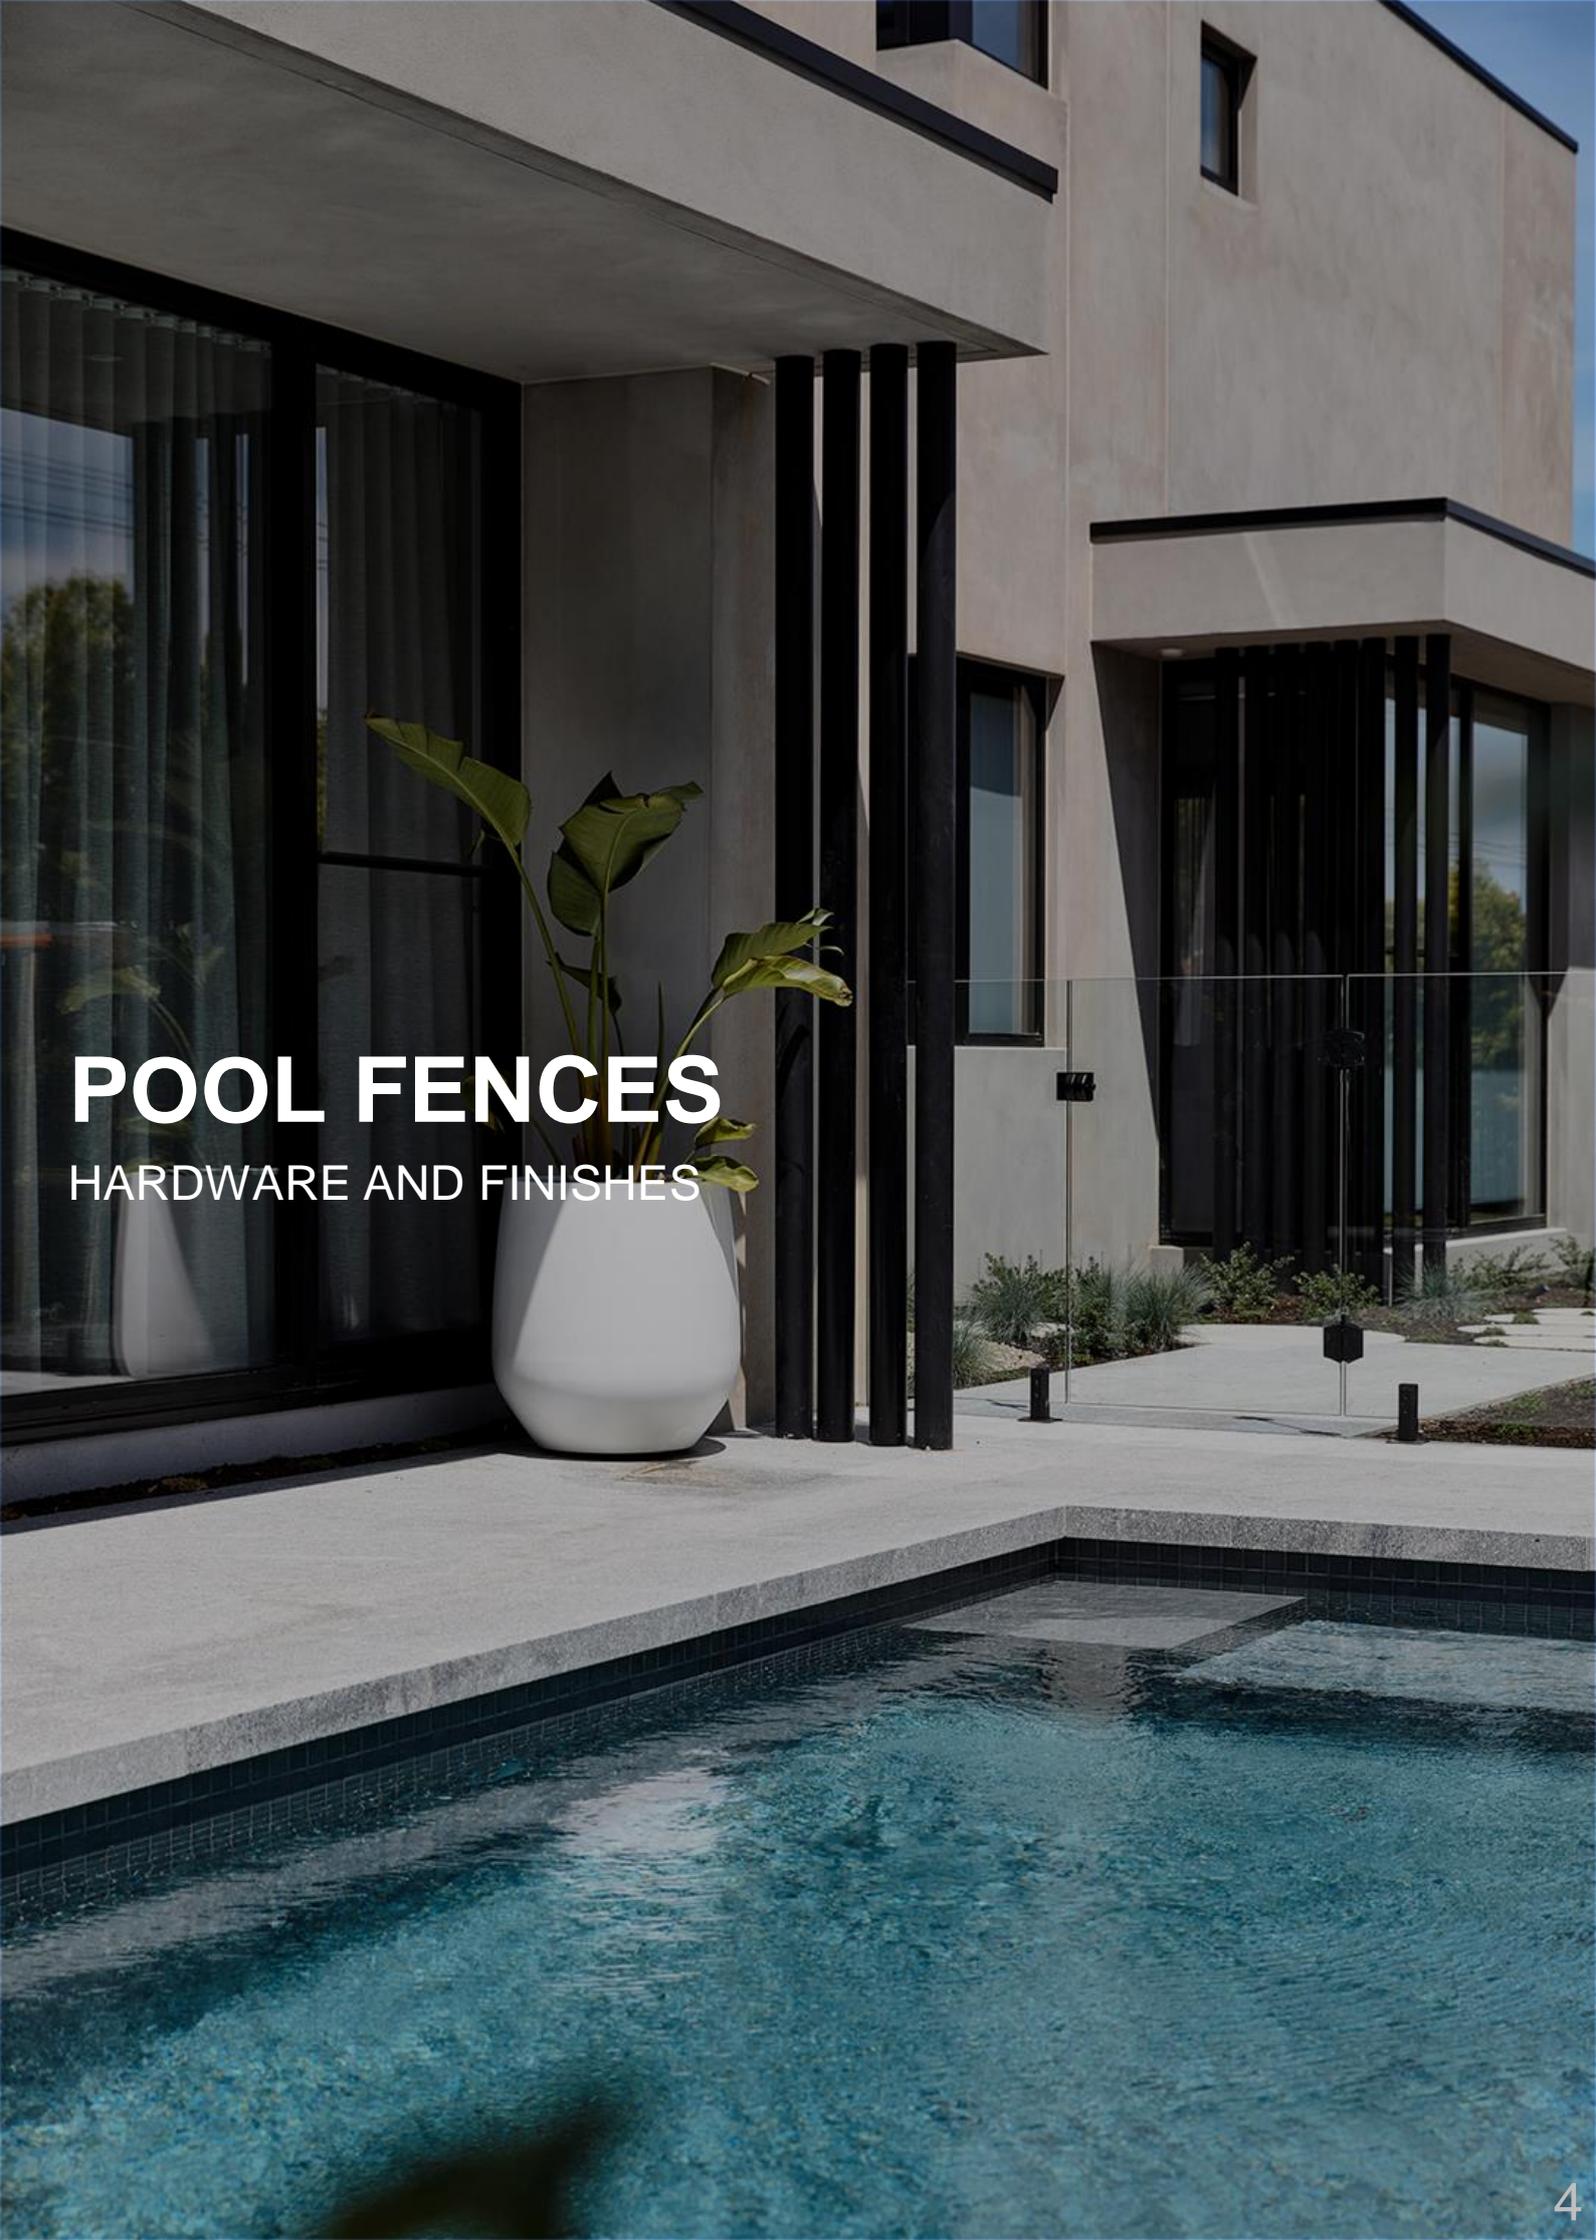

HANDRAIL

If you are choosing a handrail for safety, practicality or purely for design, all of our handrails are custom welded to perfectly fit your new glass panels. To meet Australian Standards, a handrail is required if you have a fall of 1 metre or greater, however we can opt for engineered glass which will eliminate the need for a handrail.

TOP RAIL

A top rail is a great way to add an extra design element, and are custom welded to perfectly fit your new glass panels. To meet Australian Standards, a top rail is required if you have a fall of 1 metre or greater. However we can opt for engineered glass which will eliminate the need for a top rail.

A modern, two-story house with a swimming pool. The house features large windows and a balcony with a glass railing. A large white vase with a green plant sits on the concrete deck. The pool is in the foreground, and the fence is made of glass panels supported by black posts.

INTERNAL AND EXTERNAL BALUSTRADES

INSTALLATION STYLES

We offer both **Frameless** and **Semi-Frameless** style design options for your internal and external balustrades.

FRAMELESS

Frameless balustrades are our most popular choice and you can see why! You simply can't beat how sleek and endlessly customisable a frameless glass balustrade can be.

Over the next two pages, you'll find everything you need to know about our frameless glass balustrades.

SEMI FRAMELESS

Semi frameless glass balustrades are a fantastic way to create a luxurious feel with clean lines and a contemporary look, without inhibiting the view or the sense of space. The good news, semi frameless balustrades are the most cost-effective glass option you will find, and they look great too!

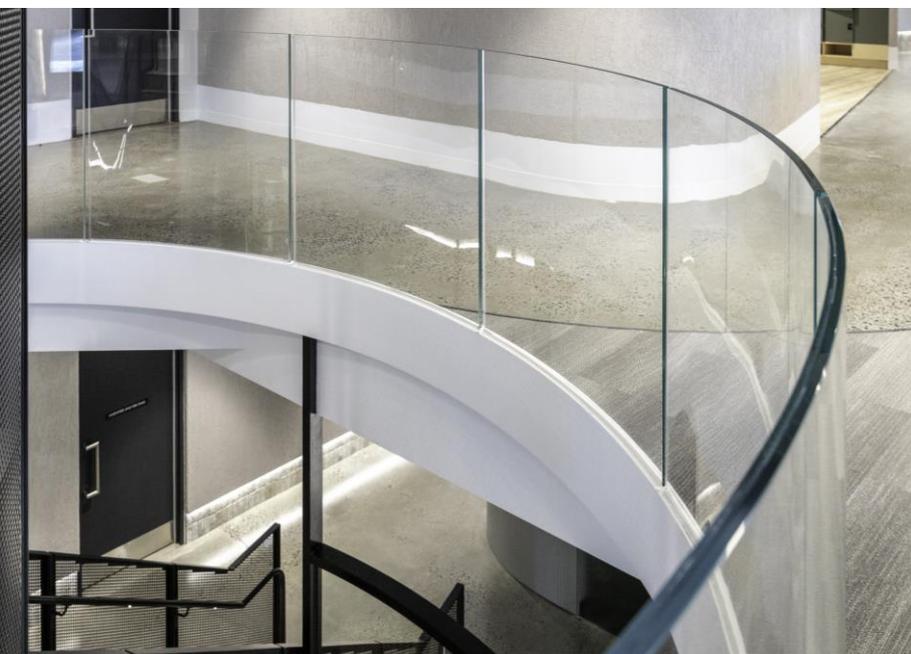

SPIGOTS

The spigot is our most popular style for frameless balustrades because it is versatile and can be applied to so many different surfaces, whilst providing a minimalistic design. Both durable and desirable with two spigots per glass panel. Often finished with a top rail if required (pictured).

STANDOFF ANCHORS

The standoff anchor can be used on balconies, decks, lofts or on rooftops without compromising the overall aesthetics by utilising every inch of floor space. This provides you with an array of design opportunities. Standoff anchors offer a unique and effective approach of using four or six pins per glass panel.

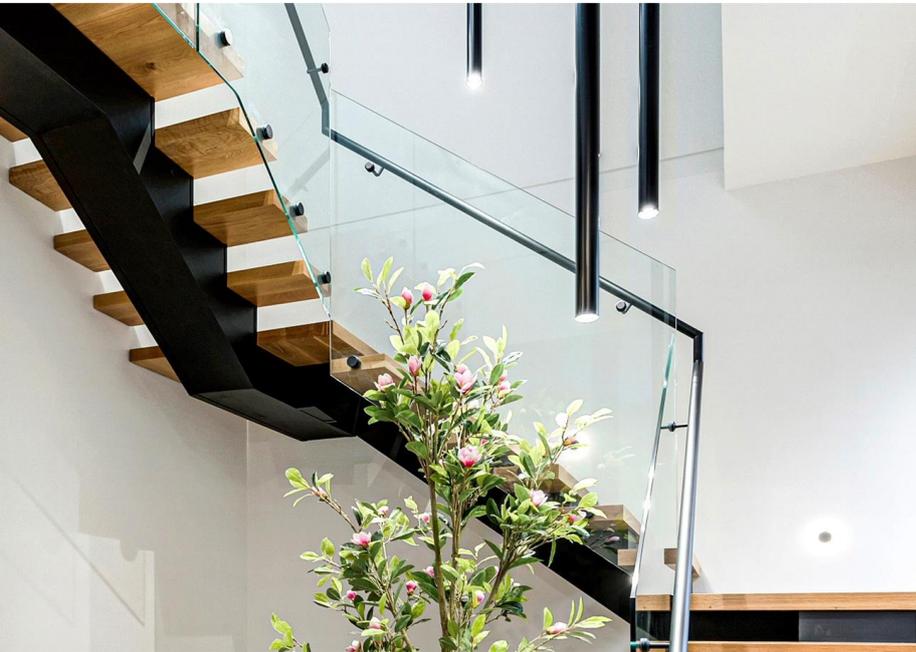

GLAZING CHANNEL

For a truly awe-inspiring design, we offer a glazing channel. With the option for embedded (pictured) or surface mount, depending on your preferred design style. This is the ultimate option to enhance beautiful surrounds, creating an ultra-modern feel to your indoor or outdoor space.

SMART SPIGOTS

Similar to standoff anchors in functionality, with a slightly different design, the smart spigot is a popular choice to create a crisp design element, allowing you to maximise the space by utilizing every inch of floor space available.

HANDRAIL

If you are choosing a handrail for safety, practicality or purely for design, all of our handrails are custom welded to perfectly fit your new glass panels. To meet Australian Standards, a handrail is required if you have a fall of 1 metre or greater, however we can opt for engineered glass which will eliminate the need for a handrail.

TOP RAIL

A top rail is a great way to add an extra design element, and are custom welded to perfectly fit your new glass panels. To meet Australian Standards, a top rail is required if you have a fall of 1 metre or greater. However we can opt for engineered glass which will eliminate the need for a top rail.

GLASS COLOURS

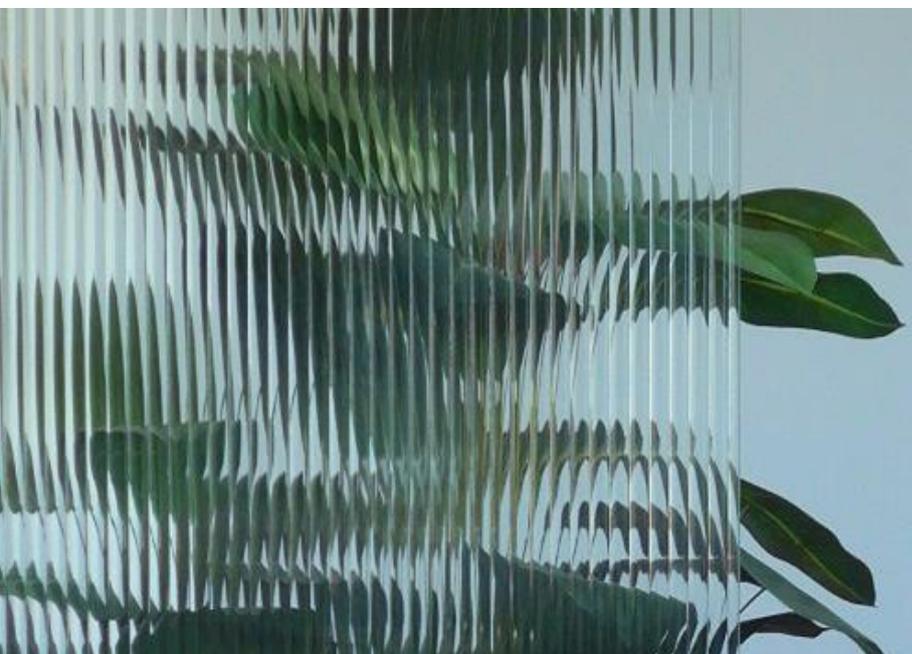

CLEAR GLASS

You can't beat the crisp appeal that clear glass offers to your indoor or outdoor space. Clear glass is a great way to allow other elements in the space to be seen and it will make the space appear lighter and more open. For an ultra clear option, we suggest opting for low iron glass.

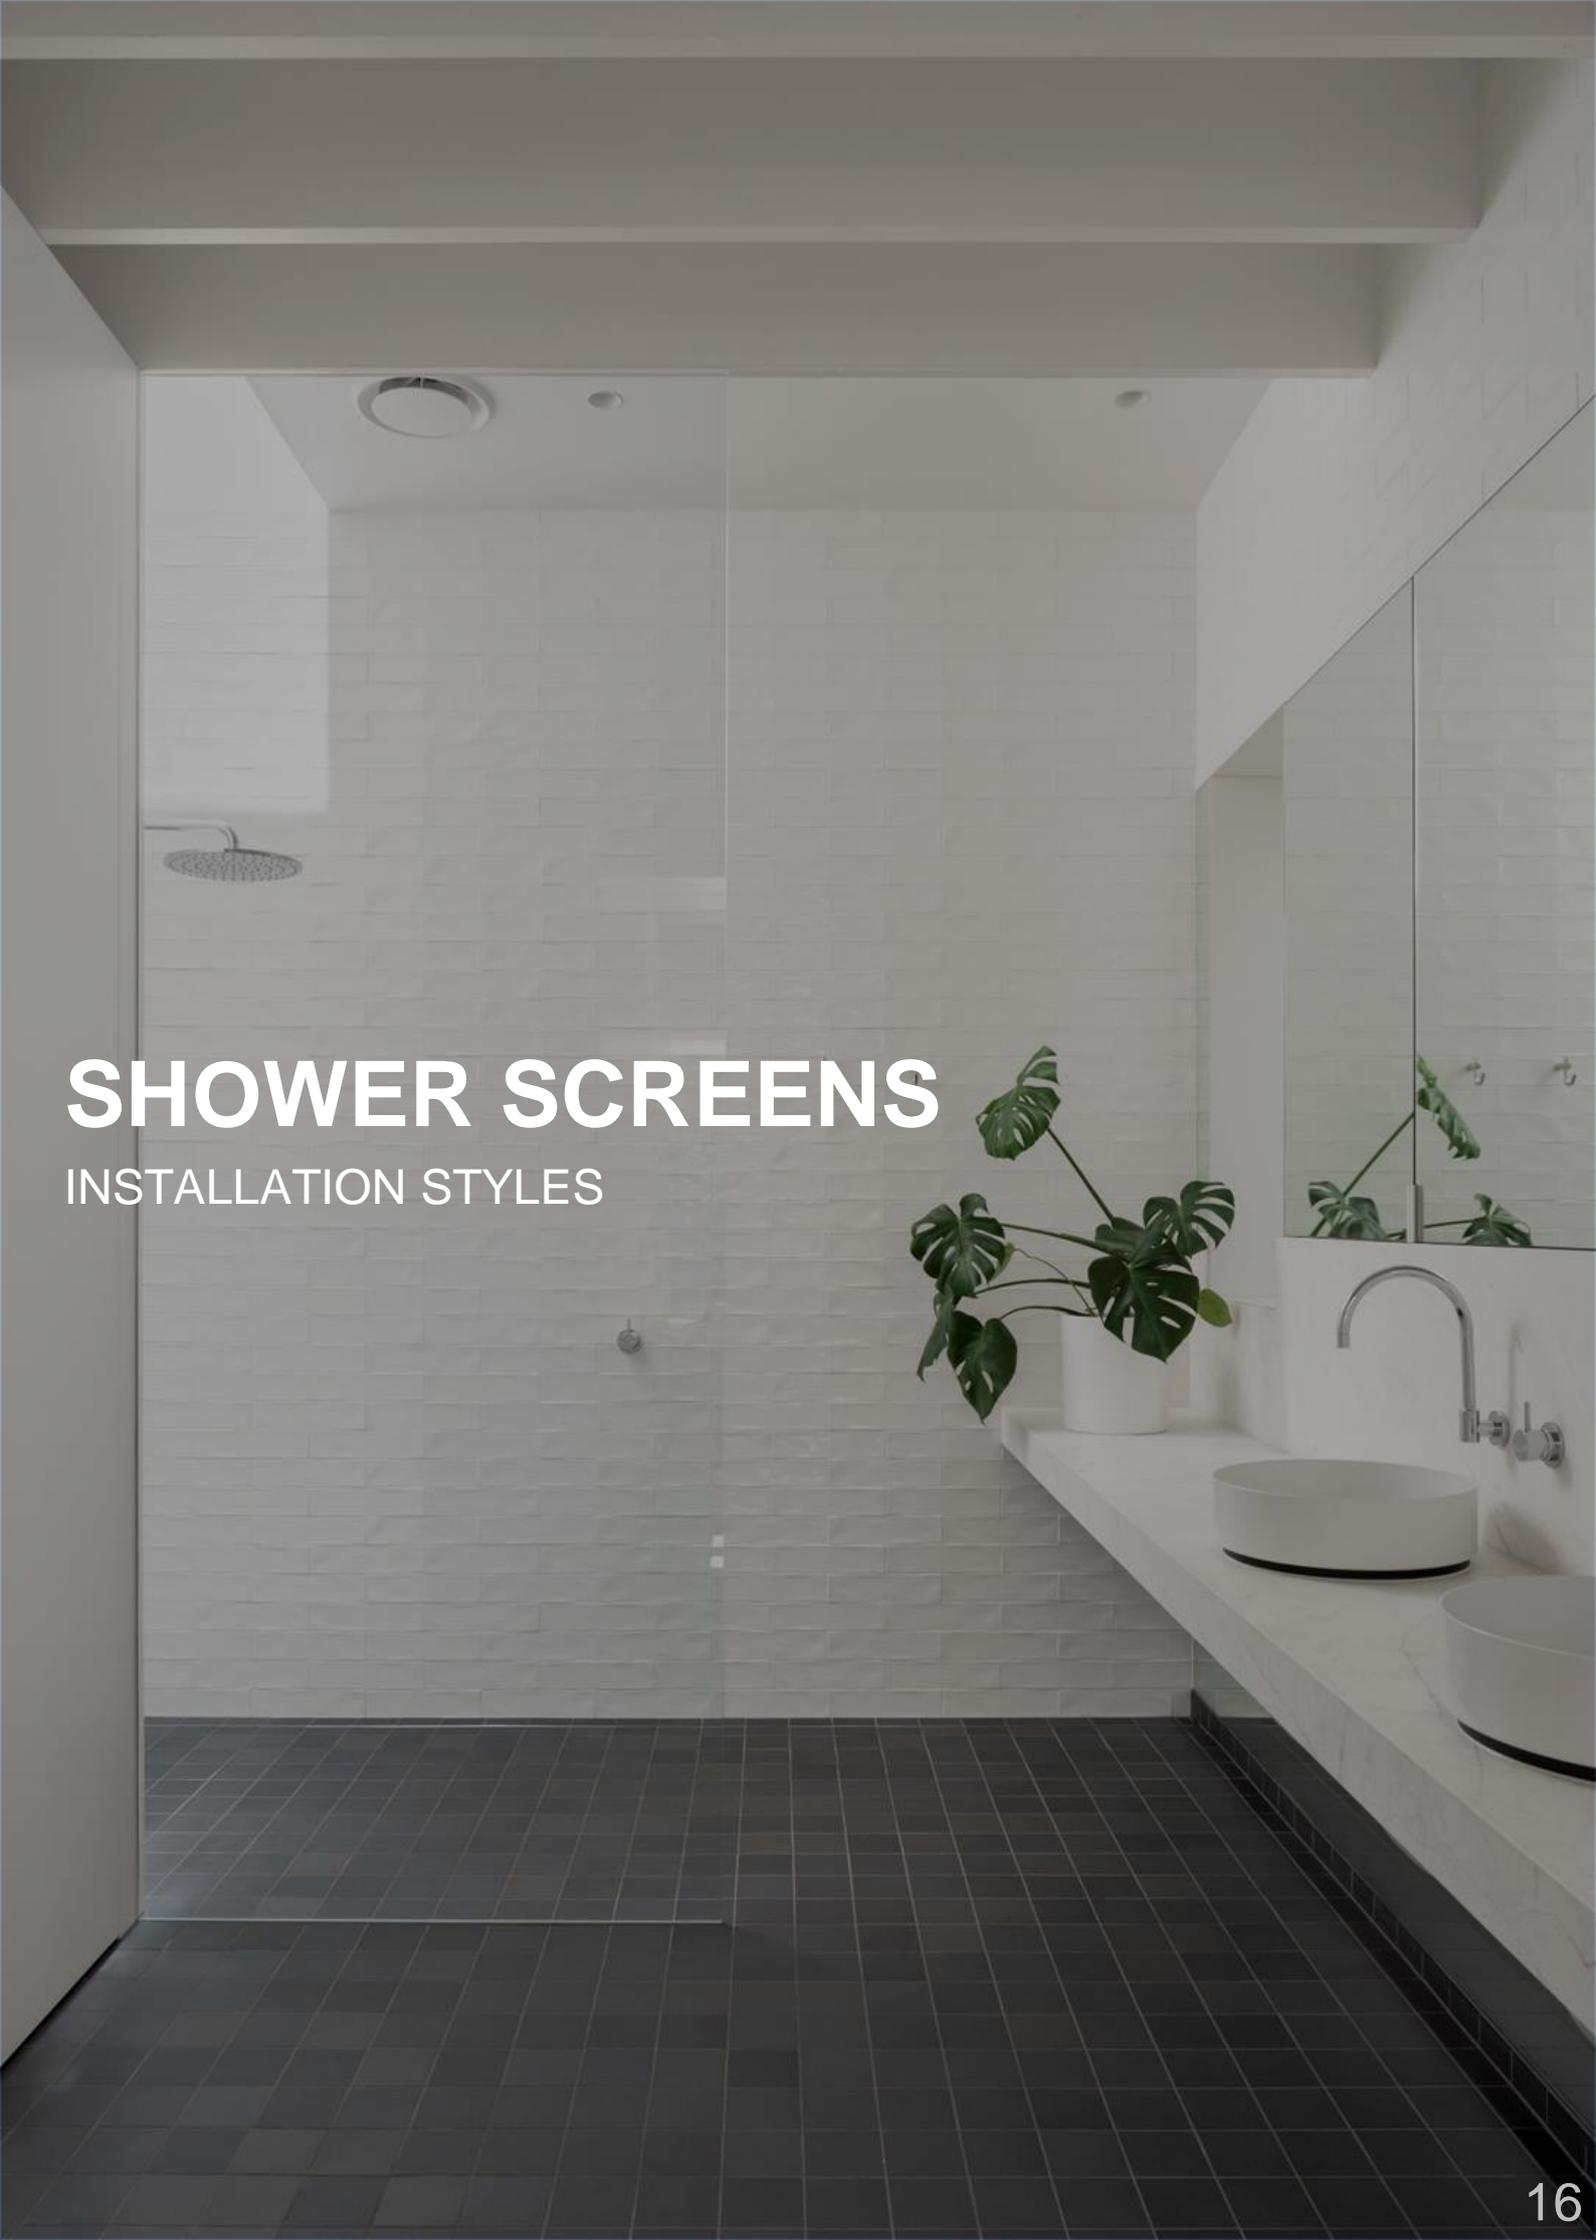

FROSTED GLASS

Frosted glass is a fantastic way to offer privacy if required or can also be used as a design statement within your space. Frosted glass balustrades are very functional and are incredibly easy to maintain.

CUSTOM GLASS

Wanting that extra special design element to your space? We offer narrow reeded glass, grey tint or a graphic film onto your glass to add that eye catching element.

A modern bathroom with a glass shower screen, a white vanity with two round sinks, and a monstera plant on the counter. The shower area has white subway tiles and a dark tiled floor. The vanity is white with a marble countertop and a chrome faucet. A large mirror is mounted above the vanity. The ceiling has recessed lighting.

SHOWER SCREENS

INSTALLATION STYLES

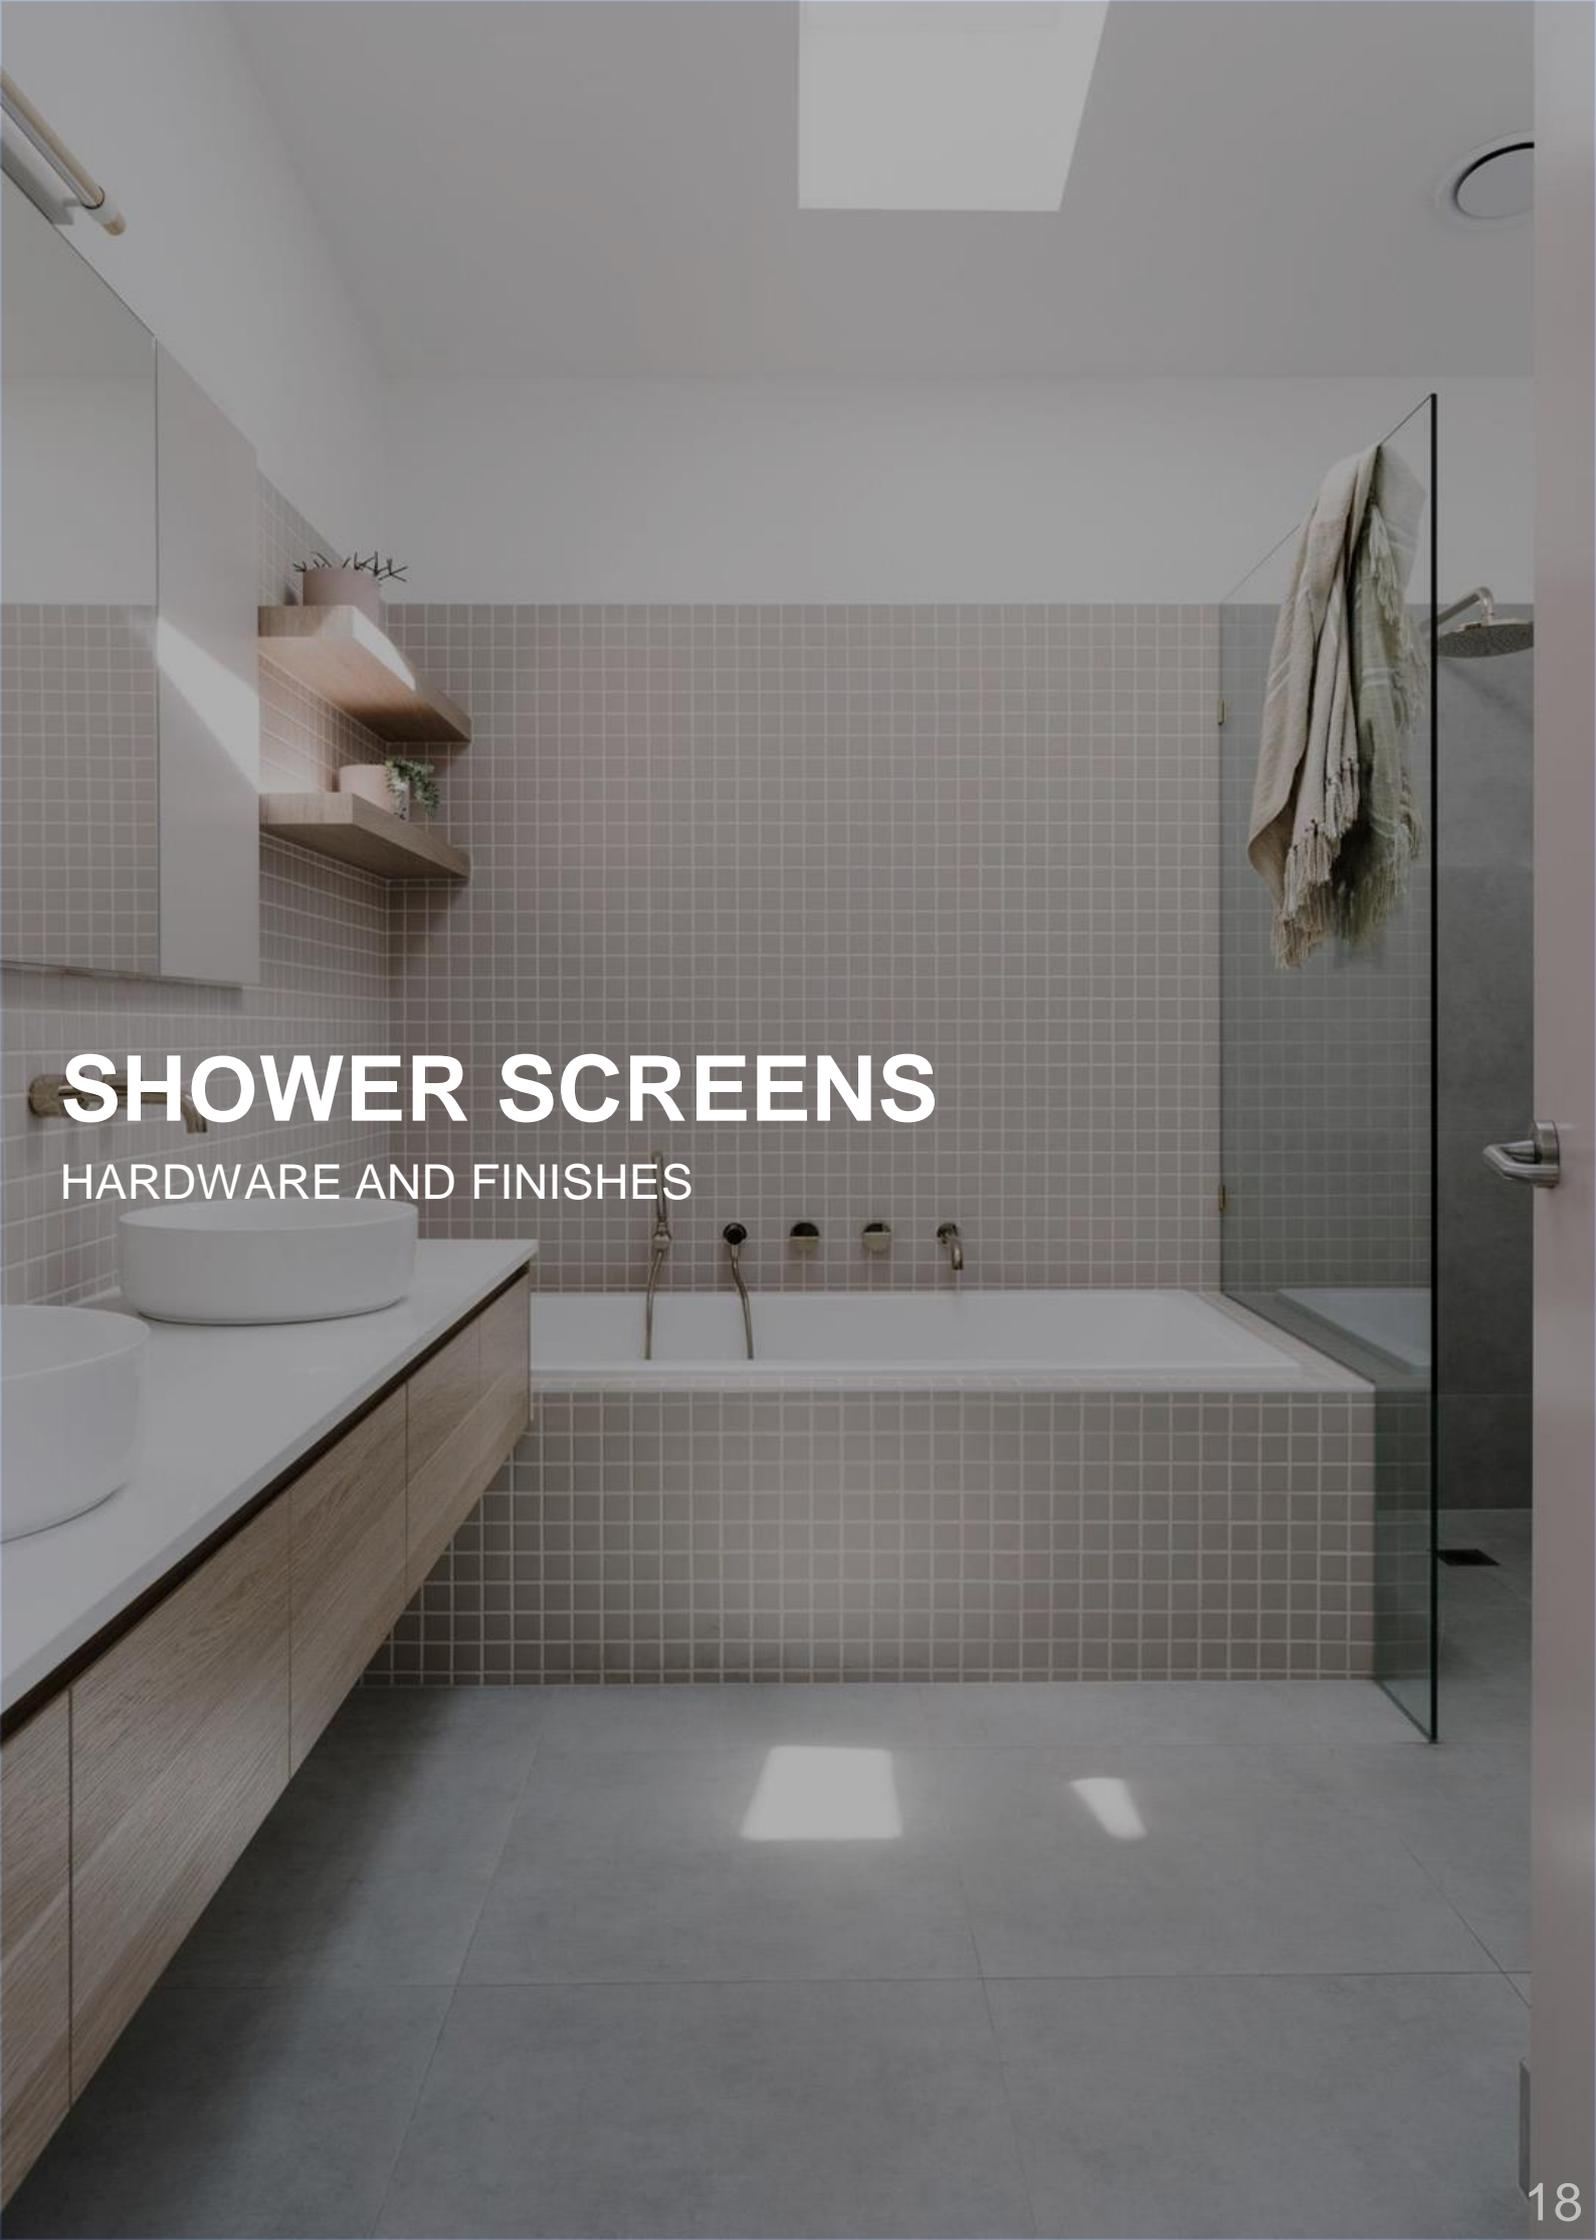

BRACKETS

Brackets are our most popular style for shower screens as it is versatile, whilst providing a minimalistic design. Being a classic solution for small and large bathroom interiors.

GLAZING CHANNEL

After a sleek design? You can't look past a glazing channel. With no hardware visible as it is embedded into your tiles, it offers a truly impressive and modern feel to your bathroom. Allowing the eye to effortlessly travel through your space, with no hardware to obscure your view.
